

The Puzzle Shop of Uncle Rebus

JOHN McCLELLAN
Woodstock, N. Y.

KEY

- | | |
|--------------------------------|--|
| 1. Uncle Rebus | 1. Non verbis sed Rebus, and vice versa. |
| 2. Moebius masks | 2. One-sided, of course. |
| 3. Str V | 3. The word, STROBOGRAMMATIC, is a happy one, and after some correspondence with Mr. Trigg, have decided to use—with the addition of 'V', 'H', and 'VH', to specify the axis, or axes, of the reflection. |
| 4. Str H | |
| 5. Str VH | |
| 6. Palindrome | |
| 7. Semordnilap | 7. Span., O! Moorish rendezvous! Aromatic! |
| 8. Cryptogram | 8. Two leaps per chasm is fatal (We ate a great many Chinese fortune-cookies before coming on this!) |
| 9. Pangram | 9. For typists and Morse Code practitioners. 30 letters was the most economical we could find, and still have the sentence make some sense. You will remember, of course, the time when two Knights of the Round Table were about to have a terrible battle, and Queen Guenever begged Merlin to intercede . . . |
| 10. Kepler's Stella Octangular | |
| 11. Bemused Mice | |
| 12. Puzzled Birds | |
| 13. Diamond Word-formation | 13. See D. Borgmann's "Language on Vacation." |
| 14. Sam Loyd | 14. Can any puzzle-piece be complete without mention of him? |
| 15. Mnemonic | 15. For recalling 2.71 . . . , base of the natural logarithms. |

- | | |
|---|---|
| 16. Mnemonic | 16. For recalling the decimals of two sq. roots. |
| 17. Double Word Square | 17. Almost. |
| 18. Cross Word | |
| 19. Real philodendron and pseudorhombicuboctahedron | 19. Rouse Ball has an interesting note on this on p. 137 of "Math. Recreations and Essays." |
| 20. Moebius Blivit | |
| 21. Anagram | |
| 22. Word Square of 4th. order | 22. This problem of making a word square on 'Cube' was proposed by Martin Gardner in a 1964 number of Scientific American. Three puzzlers came up with this solution. |
| 23. Insignia of "The Enigma." | 23. Magazine of the Natl. Puzzlers' League—edited and published by William C. Bryan of Greenfield, Mass. |
| 24. A certain magazine | |
